

Student AI Scenarios:

1. AI résumé editing (rewriting bullets, polishing language)
 - a. Minimal
2. AI mock interviews (rehearsing answers with ChatGPT)
 - a. Minimal
3. AI-written essays for placement application forms
 - a. Limited
4. AI-coded GitHub portfolio projects
 - a. Unacceptable
5. AI in graded internal assignments
 - a. High-Risk
6. AI-generated CGPA on résumé
 - a. Unacceptable
7. AI-cloned voice for asynchronous video interview
 - a. High-Risk
8. AI for skills self-assessment ("rate my Python skill level")
 - a. Minimal

Permitted uses:

AI may be used to:

- a. rewrite resume bullets for clarity and grammar
- b. simulate mock interviews for personal practice.
- c. explain technical concepts (e.g., DSA, OS topics) in study mode.
- d. generate placement-prep study schedules from a syllabus.
- e. produce one-page company-prep briefs (when verified against the company website).
- f. review and suggest improvements to student-written code

Prohibited use cases:

AI may not be used to:

- a. fabricate projects, internships, or experience that the student did not actually complete.
- b. clone the student's voice for asynchronous video interviews.
- c. generate or alter academic records (CGPA, marks, transcripts).
- d. write essays where the student's voice is the assessment criterion (Statement of Purpose, motivation letters for direct hires).

Enforcement:

The placement cell will conduct random oral defences on portfolio projects Any unverifiable AI use that violates Prohibited Uses results in:

- first violation
 - written warning + portfolio re-defence within 7 days;
- second violation
 - placement support withdrawn for the current cycle. The placement cell acknowledges that not all violations are detectable; the policy relies in part on student integrity and the broader career consequences of misrepresentation.
